

DS175 7" Hand-Held, Active Driven, Planetary Polisher

Lightest and Smallest in the World

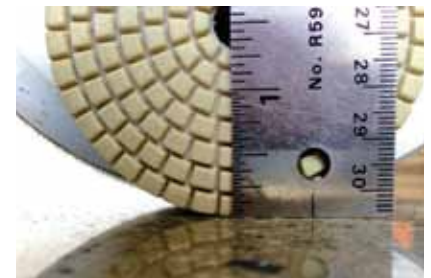

Hand-Held Concrete and Stone Planetary Polisher

When you need something that produces a flatter, swirl-free surface than a single-headed machine; for difficult to reach and/or small square foot stone and concrete work.

Part Number	DS175
Power	115V
Current	7.9 Amps
Driver Speed	2,500 to 4,700 rpm
Platform Speed	400 to 780 rpm
Weight	13 lbs

Uses three 3" diamond polishing pads or grinding discs

Features

- 7" low profile, active planetary motion base
- Motor swivels 180 degrees over the tool base
- Inter-Tool base-to-pad rpm differential
- Active gear/chain driven transmission
- Powered by a Makita variable speed motor
- Operates wet or dry
- Discs go all the way to the wall

Benefits

- Easy to use in tight areas
- The smallest planetary machine in the world
- Allows you to change the tool configuration to make it easier to reach any application
- Faster, flatter, higher polish than a single headed machine
- Increases durability
- Allows for adjustment of rpms from grinding to polishing applications
- Flexibility in use
- Easy edging
